

# PhotoTex™

## Introducing the #1 selling removable self-adhesive sign & wallpaper fabric

Photo Tex™ is a peel & stick, multi-US patented, adhesive material made of 100% polyester fabric. It can be installed on almost any surface and remain adhered in all-weather conditions. Its patented dependable adhesive can be removed and reused multiple times without any alteration or loss of StikAbility™. Our fabric material is Class A or 1 fire rated, non-toxic, green, and phthalates free.

## Install for a day or a decade!

Upon removal, Photo Tex insures a 99% chance that its adhesive will not leave a sticky residue. We believe we are the only fabric material that will not shrink, curl, rip or wrinkle with climate or temperature changes. Photo Tex (indoors) is the only self-adhesive fabric that does not have a time limit to be removed in order to prevent wall damage or material failure. (Outdoor longevity varies based on ink type and weather conditions. We suggest liquid laminating or clear coating in outdoor environments when using any solvent or latex inks)

## Photo Tex™ patented adhesive has – True StikAbility™!

Photo Tex offers 3-different versions (Original, Block-Out & High Tack) to meet all your applications. Photo Tex has the ability to wrap around wall corners or poles and even be placed on ceilings. A distinct advantage is that you can bleed to the edges and not worry about edge curling. You can actually use paint, crayons or even magic markers without seeping through the fabric. It's easy to make custom cut-outs by (contour-cut) kiss-cutting our Photo Tex.

## Over Worldwide installations

From Macy's, Coke Cola, Pepsi, Anheuser Busch, Coors-Miller, McDonald's, Victoria's Secret, Verizon, Military operations & Harley Davison – to Europe, Australia to the Middle East.
